EXAMINER'S AMENDMENT

An Examiner's Amendment to the record appears below. Should the changes and/or additions be unacceptable to applicants, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it must be submitted no later than the payment of the issue fee.

Authorization for this Examiner's Amendment was given in a telephone interview with Mr. Paul Harrity on 09/15/09.

Please cancel claims 40-44, 46-57.

Claims 40-44 (Cancelled).

Claims 46-57 (Cancelled).

*Reasons for Allowance*

1. Claims 1-39, 59 and 61-64 will be allowed.
2. The following is an examiner's statement of reasons for allowance.

The prior art references most closely resembling the applicants claimed invention is Sundqvist (U.S. 2001/0023445) and Vega-Garcia et al (U.S. 7,151,749).

First Sundqvist disclosed a method and an arrangement in packet switched networks for flow control is based on information provided in a set-up message for a real time application. The invention restricts the bandwidth of non real-time application flows in and out of a terminal so that the application associated with the real-time application are guaranteed a required bandwidth that is derived from the information in the set-up message. However Sundqvist failed to disclose “where a quantity of the second entries, in the second arbitration element, assigned to the one of the streams with the faster one of the different speeds is larger than a quantity of the second entries, in the second arbitration element, assigned to the other one of the streams with the slower one of the different speeds, where the dispatch unit is to: identify open of the second entries corresponding to a particular one of the plurality of second time slots, determine a certain one of the streams identified by the one of the second entries, and read data, associated with the certain one of the streams, from the memory” (claims 1, 21).

Second Vega-Garcia disclosed, “A method and system for dynamically altering the transmission settings of one or more computing devices engaged in a real-time communication session is presented”. The devices exchange meaningful and dummy control packets according to a standard control protocol. However Vega-Garcia did not disclose, “where a quantity of the second entries, in the second arbitration element, assigned to the one of the streams with the faster one of the different speeds is larger than a quantity of the second entries, in the second arbitration element, assigned to the other one of the streams with the slower one of the different speeds, where the dispatch unit is to: identify open of the second entries corresponding to a particular one of the plurality of second time slots, determine a certain one of the streams

identified by the one of the second entries, and read data, associated with the certain one of the streams, from the memory” (claims 1, 21).

In summary, the Examiner submits that Sundqvist and Vega-Garcia don't teach all the limitations of independent claims in combination with other elements. Specifically prior art does not teach “where a quantity of the second entries, in the second arbitration element, assigned to the one of the streams with the faster one of the different speeds is larger than a quantity of the second entries, in the second arbitration element, assigned to the other one of the streams with the slower one of the different speeds, where the dispatch unit is to: identify open of the second entries corresponding to a particular one of the plurality of second time slots, determine a certain one of the streams identified by the one of the second entries, and read data, associated with the certain one of the streams, from the memory”; therefore, claims 1-39, 59 and 61-64 have been deemed allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Adnan Mirza whose telephone number is (571) 272-3885. The examiner can normally be reached on Monday through Friday from 9:30 A.M. to 6:00 P.M.
